

Note Language: English

Version: 2 Validity:

Valid Since 14.06.2012

Summary

Symptom

Migrating environments from BPC 10 to HANA BCP using program BPC_HANA_MIGRATE_FROM_10 reports error: 'fail to migrate to BPC on HANA' in HANA SP04

Other terms

BPC on HANA, migrate, HANA SP04, hierarchy view

Reason and Prerequisites

The default database table schema should be SAP+System ID, however, the behavior changes in HANA SP04, the default schema of reference table in column view becomes SYSTEM sometimes which cause the failure of creating hierarchy view

Solution

Apply this note or upgrade to HANABPC SP01.

Important information:

This note only need to be applied on HANA 1.00.29.XX and 1.00.30.XX, the issue is fixed as of 1.00.31.XX.
