

Summary

Symptom

Central Note for SAP Planning and Consolidation 10.0 SP09, version for SAP NetWeaver

Other terms

BPC 10.0, release notes, installation, central note

Reason and Prerequisites

SAP Planning and Consolidation 10.0 SP08 is required.

Solution

SAP Planning and Consolidation 10.0 SP09, version for SAP NetWeaver contains bug fixes and corrections to 10.0.

Before You Install

Read this SAP Note in its entirety. We also recommend that you read the Planning and Consolidation 10.0, version for SAP NetWeaver Installation Guide, which is available for you on the SAP Help Portal at <http://help.sap.com/bopacnw100>.

You can find additional information about the contents of this support package in the Related Notes listed at the end of this central note.

You must update the SAP BusinessObjects EPM Solutions add-in for Microsoft Office to version SP13 for use with this release of Planning and Consolidation. We recommend that you install all components at the same time to ensure version consistency.

Downloading Planning and Consolidation NW 10.0 SP09

To download Planning and Consolidation NW 10.0 SP09, go to <http://service.sap.com/swdc> -> Software Downloads -> Support Packages and Patches -> A - Z Index -> "B" -> SAP BPC FOR SAP NETWEAVER -> SBOP PC 10.0 FOR SAP NW -> Comprised Software Component Versions.

To download the ABAP components CPMBPC 800 and POASBC 100_730, go to <http://service.sap.com/swdc> -> Software Downloads -> Installations and Upgrades -> Browse our Download Catalog -> SAP Application Components -> SAP BPC FOR SAP NETWEAVER -> SBOP PC 10.0 FOR SAP NW.

To download the ninth support package (SP09) for the two ABAP components, go to the following locations:

- o For CPMBPC 800 SP09, go to Software Downloads -> Support Packages and Patches -> Browse our Download Catalog -> SAP Application Components -> SAP BPC FOR SAP NETWEAVER -> SBOP PC 10.0 FOR SAP NW -> Comprised Software Component Versions -> SAP EPM BPC ABAP 10.0 -> Support Packages: Download object: SAPK-80009INCPMBPC.
- o For POASBC 100_730 SP09, go to Software Downloads -> Support Packages and Patches -> Browse our Download Catalog -> SAP Application Components -> SAP BPC FOR SAP NETWEAVER -> SBOP PC 10.0

FOR SAP NW -> Comprised Software Component Versions -> POA SBC
100_730.

To download the latest support package (SP13) for the EPM Solutions add-in for Microsoft Office, go to Software Downloads -> Support Packages and Patches -> Browse our Download Catalog -> SAP Application Components -> SAP BPC FOR SAP NETWEAVER -> SBOP PC 10.0 FOR SAP NW -> Comprised Software Component Versions -> SBOP EPM EXCEL CLIENT 10.0.

Click on the component and add the component to your Download Basket. Repeat this step for each component you want to download, using the links at the top of the page to locate other related components. Download the components from the Download Basket using SAP Download Manager.

Installation Instructions

IMPORTANT

To install the required components, see the Planning and Consolidation 10.0 Installation Guide, version for SAP NetWeaver, which is available at <http://service.sap.com/~sapidb/011000358700000483522011E>.

To upgrade the components, use the transaction SPAM. For more information, see SAP Note 1276941.

To install HANABPC, the aligned version for CPMBPC 800 SP09 is HANABPC 800 SP03. For details about fixes available in HANABPC 800 SP03, refer to SAP Note 1734706.

CRITICAL

If you have installed SP09, you must apply SAP Note 1803741 to solve the issue for Process Dimension with member formula referencing a parent member and cell data disappear after Save.

Documentation

Documentation is available on the SAP Help Portal at <http://help.sap.com/bopacnw100>.

Highlights of This Support Package

- o Implements parallel execution framework. See Note 1792408.
- o The system now passes the Planning and Consolidation context to the Dashboard. See Note 1788246.
- o Large documents over 10MB can now be uploaded to the Content Library. See Note 1762647.
- o Simple Chinese and Traditional Chinese can now exist together. See Note 1755399.
- o Optimizes the performance of saving comments. See Note 1751550.

Enhancements in This Release

- o Eliminations and adjustments can be run in parallel. See Note 1794758.
- o Comment column displays in Web reports. See Note 1796764.

- o Planning and Consolidation security now supports CUA. See Note 1757825.
- o Support Auto Refresh for Web Report. See Note 1801990.

Limitations in This Support Package

For details about known limitations in Planning and Consolidation 10.0 for SAP NetWeaver, see SAP note 1565985.

Header Data

Release Status:	Released for Customer
Released on:	21.12.2012 12:29:10
Master Language:	English
Priority:	Correction with medium priority
Category:	Upgrade information
Primary Component:	EPM-BPC-NW NetWeaver Version

Valid Releases

Software Component	Release	From Release	To Release	and Subsequent
CPMBPC	800	800	800	

Related Notes

Number	Short Text
1801990	Auto Refresh option for Web Report
1796764	Display Comment Column on Web Report
1794783	Improve performance when opening journal report
1794758	Run Elimination and Adjustment in Parallel
1793591	Error not handled when saving hierarchy with level > 99
1793570	K2: BAS function should only grab CALC N children
1793266	Process button is disabled when master data deletion fails
1793065	Fix Checkman error for UJE&UJG
1793060	short dump: when saving customized measure formula
1792408	Planning and Consolidation Parallel Execution Framework
1792396	K2: Ambiguity of using "."
1792339	Fail to update control status when data loading in parallel
1792312	Can not download EPM Add-in file from InstallationCenter
1791825	Dump in transaction UJFS for non-existing environment
1791817	Fix error in program UJA_ASSIGN_INFOBJECTS_CATALOG
1791506	Show an error info when amount of control results >10000
1791218	K2: members in cache might fail member validation
1791151	Handle copy member from txt which lost last line
1791122	Long error message cut off when querying data
1790606	MEASURES dimension cannot be mapped to Key Figure of BW

Number	Short Text
1790520	Keep messages after copy model & process dimension success
1790508	UJA_MD_ERROR:Failed to read master data from dimension xxx
1790121	Cannot drag the key word to script editor area
1790088	Load transaction data error for replace data/last win option
1790084	Base member has expansion icon for single memberset formula
1790067	No validation for changing base member to parent member
1789972	Cannot delete link status in copied/restored/transport model
1789932	Allow special character in dimension property name
1789443	User can't delete bulk comments
1789371	EnvironmentShell delivery for SP09
1789364	Show correct number in progress bar when copying master data
1788313	Don't allow adding user with special char to BPC Environment
1788246	BPC Context cannot be passed to Dashboard
1787773	Fix ICBooking result error with certain ICPKG_SIZE
1787738	Create index on MBR_NAME of master data table
1787650	Data Manager package no end at dumpload step for empty data
1787644	connect failure in EPM Connector for lowercase environment
1787568	Do not check run EPU task when open EPU monitor
1787168	Fix performance issue of running ct on multiple periods
1787064	Fix defect when get param through UJ0_Param
1787040	Incorrect job name when running Data Manager package
1786646	Deadlock when concurrent data loading for Cons. Model
1786599	unexpected "Accept count: 0" in Data Manager log
1786551	K2: The ASSERT condition was violated
1786508	Disable incorrect '!' icon after save and process
1786482	Ignore validate date format when select anytime
1786472	Web Report will not update after adding dimension to column
1786463	Controls fail with TSV_TNEW_PAGE_ALLOC_FAILED dump
1785377	dimension members cannot be modified after click 'save'
1785371	Show error if open EPU monitor from BPF without EPU enabled
1784955	Process shouldn't be running after click Save button
1784812	Sometimes, the selection is not updated in Activity Report
1784792	Fix member selector problem in Ownership Manager
1784416	Control Set assignment: parent member can't be selected
1783655	Support restore transaction data independently
1783149	Parallel execution cannot stop
1782923	Process measure in member formula
1782900	Dump when query same member in different hierarchy
1782497	Performer can execute review workspace when status submit
1782433	Bad performance of controls execution
1781916	The indent is wrong for descendant Members
1781765	completed activity cannot be open when assigned to a team
1781743	Upport transformation file of EPU audit report to BPC NW731
1780684	Message text is not set in program UJW_UP_INSERT_0_STATE
1780564	The EXAMPLES folders of DM is checked in UJA_DATA_CHECKER

Number	Short Text
1780503	Pound signs(##) hardcoded in pre-delivered measure formulas
1779890	Unexpected reject records when running /CPMB/IMPORT_APPEND
1779427	add axis information to enhancement spot UJQ_SHARED_QUERY
1779421	Multiple instances for CL_UJK_MD_VALIDATOR
1779007	Performance tuning for master data read
1778807	query failed with error UJJ_JRNL_ADITMS corrupt
1778799	K2: failing validation generates error log in wrong place
1778792	Add IMG param to control if check dependency when transport
1778402	Error on restoring environment from CPMBPC 801 to 800.
1778277	Add session timeout information in SSO Token
1778199	Enhance Parallel framework for concurrent test
1778152	Handle dump during transporting when enable_shared_object on
1777699	Submit a submitted activity should raise an error message
1777650	validate logic script logic with wrong syntax
1777187	dump for invalid schedule in some languages
1776659	Duplicate records for ENVIRONMENTSHELL in UJT_TRANS_OBJECT
1776639	CONVT_NO_NUMBER dump for input form
1776197	Journal table not exist in data checker since hardcode JRDT
1776154	Package status incorrect when default logic has error
1775713	Fix problem on reversing existing data of CF
1775619	SQE customized property not changed for slice dimension
1774419	K2: Logic validation doesn't accept package variable
1774371	User specified dimensions in START_BADI is not correct
1774366	The tooltip for "Archive" button is not correct
1774365	"OK" and "Cancel" buttons are needless in some popup window
1773837	Add DAP check for EPU monitor
1773374	false member validation for *XDIM_FILTER does not work
1773256	WorkStatus check is not correct when a team is a manager
1769678	SQE BADI data change doesn't take effect to result dataset
1769520	Check parent_group when add/delete/update a group dim member
1769015	Reactive BI content via UJS_ACTIVATE_CONTENT failed for SP08
1768310	Formula syntax error not figured out when processing
1768242	Fix that Ownership Manager error for specific input number
1767853	Fix account missing issue on EPU audit report
1766283	K2: Dimension members sequence not the same with in web
1766281	Display by hierarchy order can only display 30 item.
1766261	Show message for empty description in hierarchy view
1765878	Member indent is incorrect with Data Access Profile filter
1765311	The tooltip is incorrect for process list in BPF Activities
1765308	Double-byte words do not show correctly in Microsoft Excel
1764208	Save hierarchy description to BW for non-default hierarchy
1764086	K2:make *SELECT allow variable %TIME_SET% and multi value
1763693	Run SQE HANA query fail
1763657	Invalid argument error when opening a new tab in web client
1763602	K2: BAS will be supported in *XDIM_ADDMEMBERSET

Number	Short Text
1763154	Support running currency conversion by package
1763081	Can not change user preferences when active CUA
1762656	Validation issues in K2
1762596	K2: false members pass validation in both *WHEN and *XDIM
1762138	Include metadata xml with version when back up master data
1762134	Add export to csv function to EPU audit report
1762005	Unify the code to call CL_UJ0_PARAM in IMG code.
1762001	Run *START_BADI dumps when set QUERY=OFF and WRITE=ON
1761999	Long BPF email notification URL cannot be sent normally
1761998	Dump: Force symmetric refresh for large asymmetric report
1761509	Archive by category
1760480	Fix active environmentshell failed issue
1760450	Support customizing implementation when submit an activity
1760211	Improve performance for Consolidation related query
1759521	Member selector popup does not work if no description.
1759476	URL added as document converted to uppercase
1759473	"Remove" button does not work in journal template manage pag
1759434	Dimension hierarchy display issue when choose suppress 0
1759094	Amount in journal messages not match user preferences
1758997	The member selector hangs when dimension is managed by DAP
1758995	BPF web page hangs after action link is clicked
1758986	'ADDINFO1' should show details for script logic (for 10.0)
1758415	Fix performance issue of EPU monitor for getting desc
1758376	short dump: invalid dimension in tuple in execution mode
1757825	BPC security supporting CUA
1757816	Error message when changing workstatus doesn't make sense.
1757815	Fix that OM calculation is wrong in direct share mode
1757476	Add Equity Pick Up Monitor link in BPF
1756437	Return meaningful error msg when infocube not exist in RSRT
1756346	The counts of Criteria in Activity should not be limited
1755983	Books Template not support multi languages
1755399	Chinese and Chinese trad could not exist together
1753524	DAP description are not transported
1753522	CT: Enable datasource filter in OTHER field.
1753492	MAXSYSTEMREPORTQUERYSIZE works wrongly in audit data report
1753480	Duplicate data when member exists in multiple hierarchies
1751550	Optimize save comments performance
1750131	Improve Logic Script query performance during execution
1749598	It takes too much time to export during transport
1734708	BPC 10.0 NW on Browser Support Collective Note
1734706	BPC 10.0 NW on HANA (HANABPC) Collective Note
1716075	Team with more than 18 characters cannot change work status
1647910	Change value length of IMG parameter
