

SAP Note 1764251 - Documentation- Importing BW Models in SAP HANA Modeler

Note Language: English

Version: 3 Validity:

Valid Since 24.12.2012

Summary

Symptom

Customers having SAP NetWeaver BW on SAP HANA system wants to import BW models in SAP HANA Modeler as information views that can be used for reporting using cleint tools like SAP BusinessObjects Explore and so on.

Other terms

Reason and Prerequisites

1. You have implemented SAP Notes 1703061, 1759172, 1752384, 1733519, 1769374, and 1790333.
2. You have upgraded your Modeler to SAP HANA 1.0 SP05 Rev 47.

Solution

This feature enables you to import SAP NetWeaver BW objects to the SAP HANA modeling environment. The supported objects are SAP HANA optimized Info Cubes , SAP HANA optimized DataStore objects, and Query Snapshot InfoProviders. The authorizations set on the info providers and the roles on the BW side can also imported as analytic privileges. This process does not require data replication as the generated SAP HANA information models are based on the tables belonging to SAP NetWeaver BW managed schema. For more details about this feature, refer to the attached document Importing_BW_Models_Rev47.pdf.

Header Data

Release Status:	Released for Customer
Released on:	24.12.2012 06:38:34
Master Language:	English
Priority:	Correction with high priority
Category:	Advance development
Primary Component:	BC-HAN-MOD SAP HANA modeler

The Note is release-independent
