

Symptom

- You receive a message advising you to filter or rank the values to reduce data points
- How do you increase the row/cell limit or the maximum amount of data points in in Visual Intelligence?

Environment

SAP Visual Intelligence 1.0

Resolution

To increase the row/cell limit or the amount of data points that can be displayed in a chart, you must edit some Java properties for the Visual Intelligence client.

1. Browse to <INSTALL_PATH>\SAP Visual Intelligence\Desktop and edit the file SAPVisualIntelligence.ini

2. Set the following parameter to the desired value:

-Dhilo.maxvizdatasetsize

For example:

-Dhilo.maxvizdatasetsize=200000

3. Increase the maximum heap size to 2048 megabytes by setting the following parameter:

-Xmx2048m

4. Save the changes and restart SAP Visual Intelligence
