

Symptom

You want to know whether Windows 8 and Microsoft Office 2013 are supported on the SAP Business Planning and Consolidation 7.x and 10.x versions.

Resolution

1. For BPC 7.0 and 7.5 versions there are no plans to support Office 2013 or Office 2010 64-bit.
2. For BPC 7.5 versions Windows 8 and Internet Explorer 10 are being considered for inclusion in a future release, and that is being worked on currently. We cannot say as yet which release that will be appearing in, but it is predicted to be some time in 2013.
3. For BPC 10 versions we are also planning to support Windows 8, Internet Explorer 10 and Office 2013 in a future release. This work is also currently being done, and no specific release has been communicated yet, but again we expect support to be available in a 2013 release.
4. For EPM Add-In for Microsoft Office: this product is supported from Service Pack 14 onwards. See SAP Note [1855186](#) for details.
