SAP   **2009982 - How to import an attribute view into DS datastore**

Version 1   **Validity:** 25.04.2014 - active   **Language** English

Symptom

We want to import an attribute view from HANA into a Data Services datastore.

Environment

SAP Data Services.

Resolution

1. To import an Attribute View from SAP HANA into a Data Services, DS, datastore; on the Studio:
    1. Open the attribute view in Modeler.
    2. Go to Job Details history and double click the row for 'Activation'.
    3. Open the tree to 'Activation ID' + the name.
    4. Double click the CREATE COLUMN VIEW.
    5. On DS datastore import by name using the schema name and attribute view name LIKE:
        1. Table name == "pkg-ods-customer/ETL045T_ATTR_VW2".
        2. Owner == _SYS_BIC.
        3. From the string == CREATE COLUMN VIEW "_SYS_BIC"."pkg-ods-customer/ETL045T_ATTR_VW2" TYPE JOIN WITH PARAMETERS
